Allowable Subject Matter

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 3, Cease et al. (3,681,695) disclose a multipath compensation system for compensating amplitude and phase distortions in which predeviation (predetection) signals are combined on one path before having the detection applied thereto (see fig.1, column 4 line 45 to column 5 line 50).

The prior art of record fails to disclose pre-deviation and post-deviation signal combiners for combining signals on the N transmission paths in M transmission antenna paths before and after having the deviations to be compensated, respectively, and a compensator performs compensation for the deviations based on output of the pre-deviation and post-deviation signal combiners and the signals on the transmission paths to be compensated.

Regarding claims 2, 4-16, these claims are allowed as being dependent upon independent claims that have been allowed.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
